Online safety

The welfare of the children/young people who come into contact with our services is paramount and governs our approach to the use and management of electronic communications technologies.

Working in partnership with children, young people, their parents, volunteers and other agencies is essential in promoting young people's welfare and in helping young people to be responsible in their approach to e-safety;

The use of information technology is an essential part of all our lives; it is involved in how we as a non-profit organisation gather and store information, as well as how we communicate with each other. It is also an intrinsic part of the experience of our children and young people, and is greatly beneficial to all. However, it can present challenges in terms of how we use it responsibly and, if misused either by an adult or a young person, can be actually or potentially harmful to them.

We believe in values of respecting and caring for children. We will inform the appropriate authorities if we find a child is being abused or neglected.

Parent/Guardian's Signature

Please rate your level of the following by ticking: 1- Don't know ; 2-Know a bit; 3-Average 4- I know & understand 5.-I am very good
